Profile

Software Engineering student with experience in an internal application at the Panama Canal Authority, data analysis projects, and web development. I work with Python, SQL, and TypeScript and value building useful, well-documented software.

Education

Universidad Tecnológica de Panamá 2023 – present
B.Sc. in Software Engineering, in progress Panama

- Coursework in object-oriented programming, data structures, algorithms, databases, and secure development.

Experience

Panama Canal Authority May 18 – Aug. 11, 2026
Intern, Interconnectivity Division Panama

- Collaborated on an internal application for managing fiber-optic infrastructure.
- Contributed to the design and implementation of CRUD operations and real-time data synchronization.
- Supported dashboard development to visualize data and inform operational decisions.

Panama Canal Authority Oct. – Nov. 2022
Office Assistant, Secondary School Internship Panama

- Organized training information, used Excel for data analysis, and developed a project to improve internal information workflows.

Projects

UTP-Guide | *Inclusive indoor navigation* 2026

- Developing a mobile application with BLE beacons and differentiated routes for users with reduced mobility.
- Implemented RSSI-based trilateration and a Kalman filter, with an approximate positioning error of 1.6 m after field calibration. Project submitted to JIC/SENACYT 2026.

Copa Airlines Hackathon | *Data analytics and artificial intelligence* Oct. 2025

- My team placed 13th out of 129 participating teams.
- Used AWS SageMaker Canvas, SQL, and PySpark on Databricks to analyze commercial aviation data and create visualizations under time constraints.

Personal portfolio | *Bilingual web development* 2026

- Built this site with Next.js, React, and TypeScript; it includes Spanish and English routes, responsive design, and automated checks in GitHub Actions.

Technical Skills

Development: Python, SQL, TypeScript, React, Next.js, Tailwind CSS, Git, and GitHub.
Data: PySpark, Databricks, AWS SageMaker Canvas, and Microsoft Excel.
Networking and security: BLE/RSSI, networking fundamentals, basic Linux, and cybersecurity fundamentals.

Relevant Courses

Foundations of Cybersecurity — Google 2026
CCNA: Introduction to Networks — Cisco 2025
Linux Unhatched — Cisco 2025
Computer Network — Huawei 2025

Volunteering

UN, CRIC23 (Nov. – Dec. 2025): logistical support and coordination in an international environment.
FANLYC (2025): supported charitable activities.
AIESEC (2025): Sustainable Christmas initiative.

Languages

Native Spanish; advanced English; learning Swedish.
